

Workshop 16 Text Workshop

Docs » Home

Welcome to MkDocs

For full documentation visit mkdocs.org.

Commands

- `mkdocs new [dir-name]` - Create a new project.
- `mkdocs serve` - Start the live-reloading docs server.
- `mkdocs build` - Build the documentation site.
- `mkdocs -h` - Print help message and exit.

Project layout

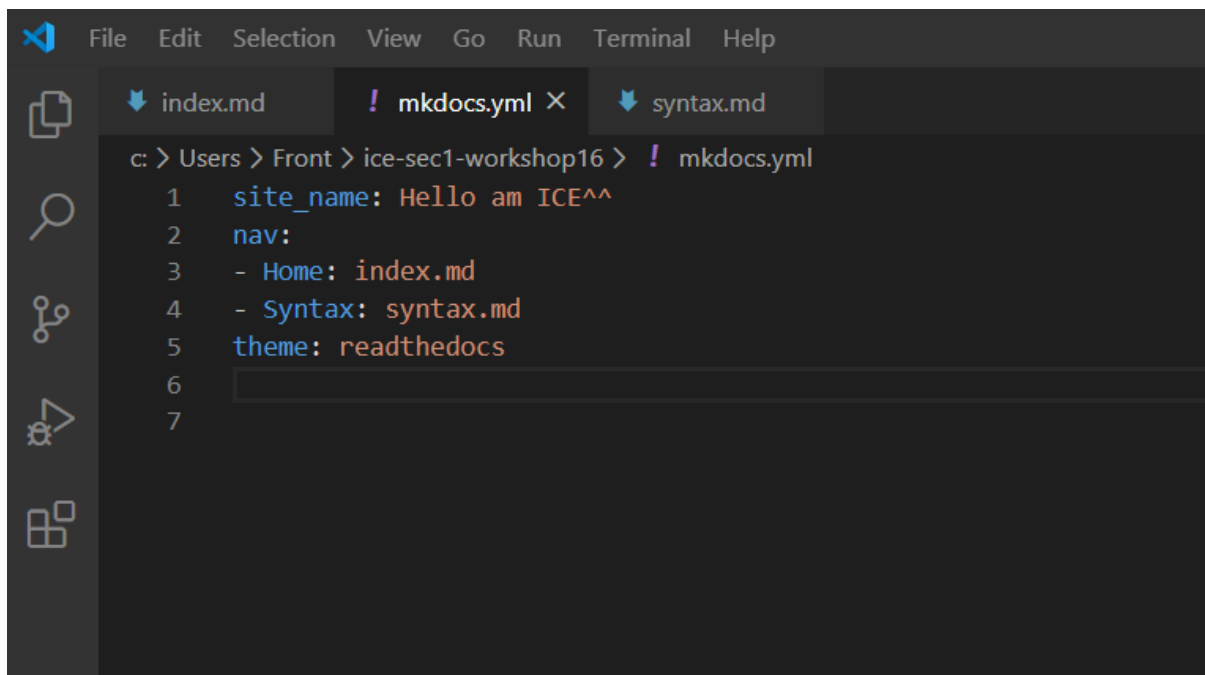

```
mkdocs.yml # The configuration file.
docs/
  index.md # The documentation homepage.
  ...      # Other markdown pages, images and other files.
```

Next ➞

Built with MkDocs using a theme provided by [Read the Docs](#).

// I have to run the server first before I can get into this <http://localhost:8000> page by using this command `mkdocs serve`.

// This is my page that I change `site_name` to "Hello am ICE^^" and it will have two navigation bar which is Home and Syntax page. Moreover, for the theme that I use. I just use it as same as in the lecture that you provided.

```
File Edit Selection View Go Run Terminal Help
index.md mkdocs.yml x syntax.md
c: > Users > Front > ice-sec1-workshop16 > ! mkdocs.yml
1 site_name: Hello am ICE^^
2 nav:
3   - Home: index.md
4   - Syntax: syntax.md
5 theme: readthedocs
6
7
